

Site Location: Ballinasloe, Co Galway.

This site consisted of 5 hectares of good quality Sitka Spruce, with a stocking of 2300 trees per hectare before thinning and 1600 trees per hectare after thinning.

Total tonnage from site: 452.50

- Saw log: 50.42 tonne = 17%
- Pallet: 154.58 tonne = 53%
- Woodchip: 247.50 tonne = 85%

Whole tree Harvesting.

- 452.50 tonne
- 90.50 tonne per hectare
- €6883.61
- €1376.72 per hectare
- 161 tonne tops/branches removed

Using the whole tree harvesting method resulted in a substantial increase in volume recovered from this site and revenue paid to the forest owner. It is estimated that 57 tonne per hectare would have been achieved using standard harvesting methods.
